Dual-Tuner DVB-T Stick

Supercharged TV for your Mac or PC

EyeTV Diversity is a powerful dual TV tuner stick (DVB-T or Freeview) for digital television live on your Mac or PC. Watch one TV show and record another at the same time, or switch to Diversity mode to enjoy superior digital TV reception. In Dual Tuner mode the two TV tuners operate independently; in Diversity mode, the two integrated TV tuners work together to achieve optimal reception.

EyeTV Diversity comes with EyeTV 3, the award-winning TV software for Mac. Watch, pause, and rewind live TV on your Mac. Search the Program Guide, record TV shows, and export recordings to iTunes automatically for playback on an iPhone or iPad. EyeTV Diversity works great with Windows 7 Media Center, and includes THC software for Windows which supports many of the same features as EyeTV 3.

What's in the Box

- EyeTV Diversity TV receiver
- Two rod aerials (1 x IEC, 1 x MCX) with tilt/swivel magnetic base and detachable suction cup
